

David Cervantes

Customer-First Strategy · AI Transformation · Product Leadership

uxokdc@gmail.com | (941) 993-9125 | Orlando, Florida, US | <https://www.uxokdc.com> | <https://www.linkedin.com/in/davidcervantes/>

Professional Summary

Product, design, and technology leader with 25+ years guiding organizations through shifts in customer behavior, digital channels, product delivery, and emerging technology. I build teams, practices, roadmaps, design systems, and operating standards while staying close enough to the work to turn ambiguity into a clear product direction. My background spans executive leadership, consulting, B2B and consumer products, digital transformation, and hands-on AI product development—positioning me to help organizations adopt AI without losing customer trust, design quality, or business focus.

Core Capabilities

Executive & Organizational Leadership

Product vision, Design leadership, Technology strategy, Digital transformation, Team building, Practice development, Mentoring, Operating models

Product & Customer Strategy

Customer experience, Product discovery, Roadmaps, Research, Service design, B2B and consumer products, SaaS, E-commerce

AI Strategy & Product Innovation

AI product strategy, Agentic workflows, Human-AI interaction, Governance and approval, Design-to-code, Emerging technology

Cross-Functional Delivery

Product, Design, Engineering, Marketing, Creative, Analytics, Agile delivery, Vendor leadership

Selected Product & Transformation Work

Seamless Agent OS

An orchestration and operating layer for coordinating AI workers, projects, memory, notifications, human approvals, and autonomous workflows across multiple products.

- Defined the product model for agent ownership, task routing, escalation, attention management, fleet health, and project analytics.
- Designed workflows spanning always-on server automation, human review, browser tasks, research, QA, and multi-model execution.
- Created a product experience that keeps people in control while allowing specialized AI workers to operate continuously.

Ulta Beauty — Self-Service Retail Media Platform

B2B advertising platform enabling brand partners to launch, manage, analyze, and optimize campaigns using Ulta's first-party customer data.

- Designed campaign setup, audience targeting, analytics, attribution, optimization, and omnichannel delivery workflows.
- Translated complex AdTech capabilities into a scalable self-service SaaS experience.

TraderVault LM

AI-native trading platform for building strategies, backtesting historical data, interpreting performance, and moving toward live execution and copy trading.

- Shaped the experience around real trading behaviors, strategy logic, risk management, and decision patterns.
- Designed AI explanations that clarify why strategies succeed or fail instead of returning a black-box score.
- Owned discovery, product strategy, brand, experience design, AI workflows, and design-to-code direction.

Momenta CRM

AI-native real estate platform designed around a persistent advisor that understands buyer intent, maintains context, supports decisions, and coordinates specialist handoffs.

- Connected property discovery, valuation, education, decision support, communication, and specialist handoffs in one experience.
- Designed conversational behavior, memory, escalation, and proactive recommendations around the buyer journey.
- Owned product strategy, research, UX, conversational workflows, and AI experience design.

NESTRE — Cognitive Training Platform

Adaptive cognitive-training and mental-wellness platform translating a neuroscience-backed methodology into a scalable digital product.

- Designed mobile-first training workflows, adaptive programs, progress tracking, and organizational dashboards.
- Balanced scientific credibility, motivation, personalization, and ease of use.

Professional Experience

Independent AI & Product Design Practice | Founder / AI & Product Design Lead

Remote

2023 – Present

Lead AI-native product strategy, experience design, workflow architecture, prototyping, and design-to-code delivery across fintech, real estate, construction, retail, and emerging product categories.

- Set product vision and led strategy, experience design, workflow architecture, and implementation direction across a portfolio of AI-native products.
- Developed Seamless Agent OS as an operating model for coordinating specialized AI workers, projects, approvals, escalations, QA, and human attention.
- Created reusable approaches for AI product behavior, conversational systems, proactive intelligence, human handoff, and design-to-code delivery.
- Balanced product direction, customer experience, technical feasibility, brand, delivery speed, and operating cost across multiple ventures.
- Used current product work to establish a practical point of view on how design, product, engineering, and AI workflows should operate together.

Bang Energy | VP, Technology & User Experience

Weston, Florida

2021 – 2023

Led digital experience, technology strategy, and business transformation across product, web, creative, and marketing.

- Defined digital modernization vision and roadmaps across product, technology, web, creative, marketing, analytics, and customer experience.
- Built and directed distributed teams of designers, writers, developers, managers, and creative professionals.
- Established operating standards for product delivery, UX, agile execution, analytics, testing, site performance, conversion, and quality.
- Aligned executive stakeholders and cross-functional teams around priorities, investment decisions, vendors, and measurable outcomes.
- Led early exploration in AI, Web3, blockchain, and creative automation while mentoring managers and future leaders.

Peak Activity | UX Director / Practice Lead

Boca Raton, Florida

2017 – 2021

Led the UX practice across client engagements from business and product strategy through research, interaction design, prototyping, and delivery.

- Led the UX practice, team quality, staffing, methods, client strategy, and delivery across complex consulting engagements.
- Directed mid-to-senior designers and partnered with product, strategy, content, analytics, and engineering leaders.
- Built a reusable mobile-first design system and introduced stronger prototyping, experimentation, testing, and craft standards.

- Guided clients and internal teams through discovery, prioritization, product strategy, and design decision-making.

Office Depot | Senior UX Architect
2015 – 2017

Boca Raton, Florida

Led major mobile and B2B experience initiatives across Office Depot's digital ecosystem.

- Designed the mobile application and mobile web experience from architecture and interaction design through post-launch optimization.
- Led the redesign of the B2B portal supporting contract pricing, account administration, purchasing, and repeat ordering.
- Created an atomic-design style guide that became a foundation for the company design system.
- Applied accessibility standards, analytics, A/B testing, and multivariate testing to improve usability and conversion.

AIM Consulting | Director of User Experience
2013 – 2016

Dallas, Texas

Led UX strategy and delivery for web and mobile applications across multiple industries and client organizations.

- Directed comparative research, information architecture, interaction design, service design, and rapid prototyping from discovery through QA.
- Built high-fidelity interactive and coded prototypes using Axure, HTML, SCSS, and JavaScript.
- Translated complex business requirements into clear workflows for clients including Novation, Verizon, and Travelocity.
- Worked directly with customers, product owners, business stakeholders, designers, and developers to protect design intent through implementation.

Independent / Consulting | UX Strategist & Digital Producer
1990 – 2012

Dallas, Texas

Worked across digital strategy, user experience, interactive production, advertising, and emerging digital channels for national brands including Nissan, Pepsi, and Levi's.

- Led information architecture, interaction design, prototyping, digital production, analytics, and integrated campaign initiatives.
- Managed work from concept through production and launch across print, web, mobile, social, television, radio, and point-of-sale.
- Coordinated designers, writers, developers, producers, vendors, and external partners.
- Helped organizations adapt established brands and business models to new digital channels and technologies.
